PROFILE

Backend-leaning web developer with 6+ years in fintech, e-commerce and customer service: APIs, integrations, automation and, lately, AI agents. Learns each new stack on the job and builds with AI.

WORK EXPERIENCE

Lead Web Developer at FlightHub June 2026 - Present

Web Developer at FlightHub June 2022 - June 2026

- Develop Mila, FlightHub's AI customer-service agent: 90% of chats handled, 60%+ fully resolved (Sep 2026).
- Contributed to the in-house agent framework (tool calling, human-in-the-loop) and prompt management.
- Built a supplier-payments hub (virtual cards, multi-processor routing) with fail-closed refunds and payouts.
- Built fraud detection, a transaction graph, the chargeback data layer and reconciliation pipelines.

Magento Developer at Qlicks January 2022 - March 2022

- Sped up and extended Magento 2 stores for retail brands.

PHP Developer at COLLABA.dev August 2021 - January 2022

- Owned core architecture and database design for a trading platform's backend (accounts, reporting, funds).

Backend Developer at SapientPro March 2021 - August 2021

- Built Laravel and Node.js apps for price tracking, automated purchases, web scraping and monitoring.

Web Developer at ArtCode July 2020 - March 2021

- Modernized legacy PHP apps, improved an e-commerce platform and integrated payment gateways and hardware.

Technical support at ChatOS May 2019 - February 2020

- Supported and tested a browser automation platform.

EDUCATION

Master of Software Engineering September 2017 - December 2018
Yuriy Fedkovych Chernivtsi National University

Bachelor of Computer Engineering September 2013 - June 2017
Yuriy Fedkovych Chernivtsi National University
